## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James Salter on 7/1/2009.

In the Claims

13. (Currently Amended) A method comprising:

~~a policy complier to generating~~ **generate** a configuration data abstraction layer ~~[[for]]~~ of a routing policy to map a routing policy configuration to an intermediate layer;

~~a policy complier to verifying~~ the intermediate layer against a set of verification rules for one or more of a plurality of client protocols including one or more versions thereof, the set of verification rules being associated with a client dynamic link library (DLL) for each of the client protocols;

~~a policy complier to verifying~~ field-operator pairings in the routing policy and verifying one or more arguments used for each field-operator pairing in the routing policy; and

~~a policy complier to generating~~ **generate** a compiled policy transmission language when statements of the intermediate layer are verified against the set of verification rules for the one or more of the plurality of client protocols including the one or more versions thereof.

55.(Currently Amended) A method comprising:

Art Unit: 2432

a policy complier to generating generate libraries for attach points associated with one or more versions of one or more of a plurality of client protocols, the libraries to include capabilities for the one or more versions of the one or more of the plurality of client protocols, the libraries to describe fields supported by an associated one of the versions of the one or more of the plurality of client protocols, the libraries further to describe operators supported by the fields for the associated one of the versions of the one or more of the plurality of client protocols, the libraries further to include a verification function for field-operator combinations associated with one of the versions of the one or more of the plurality of client protocols; and

a policy complier to individually checking statements of a routing policy against the capabilities of one or more of the attach points and individually checking the statements when the routing policy is initially being defined.

75. (Currently Amended) A method comprising:

a policy complier to transitioning between routing policies, wherein a first configuration state is associated with a first route policy, wherein a second configuration state is associated with a second route policy, and wherein the first configuration state is a current configuration state of a router;

a policy complier to grouping configuration elements of the second route policy into policy statements and sets;

a policy complier to verifying the grouped configuration elements against capabilities with verification rules associated with one or more versions of one or more of a plurality of client protocols;

a policy complier to compiling- compile statements of the second route policy when verified for at least one of the one or more versions of the one or more of the plurality of client protocols; and

a policy complier to notifying the at least one of the one or more versions of the one or more of the plurality of client protocols that the second route policy is to take effect.

Embodiments of the invention may be implemented in one or a combination of hardware, firmware and software. Embodiments of the invention may also be implemented as instructions stored on a machine-readable medium, which may be read and executed by at least one processor to perform the operations described herein. A

machine-readable medium may include any mechanism for storing or transmitting information in a form readable by a machine (e.g., a computer). For example, a machine-readable medium may include read-only memory (ROM), random-access memory (RAM), magnetic disk storage media, optical storage media, flash-memory devices, ~~electrical, optical, acoustical or other form of propagated signals (e.g., carrier waves, infrared signals, digital signals, etc.), and others.~~

### ***Allowable Subject Matter***

Claims 1, 4-20, 55, and 58-88 are allowed.

The following is an examiner's statement of reasons for allowance: The Applicant's invention is directed to policy compiler that generates and maps routing policy and verifies the policy with rules.

The closest prior art that relates to Claim 1, 3-20, 55, 58-74 is US Patent 5625823 to Debendictis et al.(hereinafter Debendictis), where parameters are being substituted see Fig. 13 and verifying the fields, operators and arguments against a rules associated with dynamic link library(DLL) see Col 16 Ln 19-46. That is, Debendictis discloses reducing the input routing policy to a substitute parameters and then checks the rules associated with DLL see Col 23 Ln 14-49. However, Debendictis does not disclose the dynamic link libraries (DLL) associated with different versions of a one or more client protocol.

The closest prior art associated with claims 75-88 is US Patent 6598034 to Kloth. Kloth discloses a routing engine where the packets are processed based on certain rules that complied in real-time see Abstract. Kloth also discloses the rules being applied based on user input see Fig. 7 item 720; detecting patterns among the IP data flow see Fig. 8

item 806; and applying rules according to patterns see Fig. 8 item 808. However, Kloth does not disclose the rules being associated with one or more versions of the one or more plurality of client protocols.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
